NARRATIVE REPORT

HYGIENE IMPROVEMENT OF NATURAL LAND OPERATION (HINLO)

January, 26 2019
Engineering Building

Photo taken during the HINLO

Photo taken during the cleaning on the afternoon

Due to the earthquake happened last 2017, the Engineering building was damaged and now is already repaired and ready to be use. But because of the repairing and construction happened in the building, it was still mess and many trashes, dust and dirt was scattered in the area. By this reason, the College of Engineering and Information Technology Officers decided to conduct a Hygiene Improvement of Natural Land Operation (HINLO) and it was actively participated by the student buddy last January, 26 2019 at the 3rd and 4th floor Engineering Building. The HINLO activity is very important in preparing the classroom for the resume of classes so that the classroom will be use and the demand of classroom will be partly solve while the construction of more classroom is on its way.

The said activity was participated by the CEIT students, headed by the CEIT Officers and supported by CEIT faculty and staff. The students are divided for the task that they will do. Half of the students was tasked to clean the 3rd floor and the other half is task to clean the 4th floor. The half group of the students is divided to 10 and assign in each classroom to clean. With a broom, dustpan, rag and map in them as a sword to kill the trashes, dust and dirt scattered, the student buddy is inspired and well-motivated to clean their task to have a better classroom facility. The CEIT student buddy was more of excited than hustled to use again their very own building after a very long time.
